

Override Switch Fitting Instructions

IMPORTANT NOTICE:

This override switch is to only be used with a Revotec Electronic Fan Controller. Any other use will invalidate all warranty on this product.

- 1) Locate the switch bracket and switch decal. Apply decal to the switch bracket face.
- 2) Attach the bracket in the desired position using the self tapping fixing kit provided.
- 3) Unscrew the locking nut from the switch and remove along with the star/lock washer.
- 4) Attach the switch, feeding the locator arm through the centre hole of the bracket. The switch will only fix and hold securely one position.
- 5) Secure the switch in place with the locking nut and star/locking washer removed earlier.
- 6) Attach the Red pointer knob using a small flat head screw driver. Before tightening please ensure that the locator arm is turned to all the way to the left (**OFF**) then ensuring that the Red pointer knob is pointing towards the **OFF** position.
- 7) Follow the wiring diagram below to complete the wiring installation.
